

# IdaPro® MPP

We believe the freshest, most consistent milk product ingredients lead to the best tasting end products. IdaPro® products are the freshest in the market.

## IdaPro® Milk Permeate

- First Grade A milk permeate available in the market place
- Non-hygroscopic
- Near neutral pH
- The ash contains calcium, phosphorus and other valuable minerals

## High Quality and Reliability of Supply

- Vertically integrated
- Full lot traceability from milking parlor to finished product
- Closed-loop temperature-controlled system from milking parlors to finished product
- Facility utilizes proprietary processing steps
- Dedication to food safety and quality management systems

## Cost Effective Dairy Ingredient Alternative

- Milk Permeate is a good ingredient alternative to skim milk powders, whey powder and lactose
- IdaPro® MPP can replace a sweet whey powder 1:1 and non-fat dry milk up to 20%
- Historically priced lower than the lactose and non-fat dry milk market, offering margin benefits to formulators
- Has a low affinity for moisture
- Contains flavor potentiators and milk minerals to deliver desirable salty notes without high sodium levels

## Why IdaPro® MPP?

IdaPro® Milk Permeate Powder (MPP) is produced by removing the protein from fresh skim milk through ultra-filtration and dia-filtration processes. Because it is produced from fresh skim milk, it has not been altered in any way through the manufacturing of other products.

IdaPro® Milk Permeate Powder has a clean, mild, sweet milky flavor and aroma, excellent for baking applications.
